

Job Announcement

Job Title: Chief Eng/Dir Water Resource

Location: Topeka, Kansas

Req. No: 156782

Agency Name: Kansas Dept of Agriculture

Applications accepted through: Open until filled

Recruiter: Tammy Farr (785) 296-2658

This is a senior level classified position responsible for the development of water policy, interstate compact management, and management of the division of water resources. This position develops laws, regulations and policies pertaining to the overall management of water resources within the state of Kansas. Incumbent exercises individually assigned statutory jurisdiction to fulfill legislative mandates regarding administration and enforcement of Kansas Water Laws. The position will hold public and administrative hearings, issue orders and findings relative to complex water issues, and appropriate water rights. There is considerable travel to appear before public groups and represent the state on various committees and river compacts. Position calls for excellent written and verbal skills. The ability to multi-task and manage a multi-faceted program is necessary. Position will remain open until filled. **MINIMUM REQUIREMENTS:** Licensed as a professional engineer by the Kansas Board of Technical Professions. Seven years of experience in water resources engineering or management, hydrology, and water law administration, including three years of supervisory experience.

To apply for this position online go to: <http://jobs.ks.gov> and complete the Employment Summary Application or mail application to: KS Department of Agriculture, Human Resource Office, 109 SW 9th St., Topeka, KS 66612.
